Alper **Sarper**

Senior Frontend Engineer

Istanbul, Turkey

(+90) 5426467305 | alpersarper.dev@gmail.com | alpersarper | alpersarper

Summary

Frontend Engineer with 5+ years of experience designing and building **web and mobile products** across multiple industries. Specialized in **real-time systems**, **high-availability applications**, and **24/7 operational platforms**. Strong background in frontend architecture, performance optimization, and technical leadership within product-focused engineering teams.

Skills

Frontend	React, Next.js, TypeScript, React Native
State Management	Redux Toolkit, Zustand
Testing	Playwright, Cypress, React Testing Library
Backend	Node.js, NestJS, REST APIs, GraphQL
Platform	Docker, AWS, CI/CD, Sentry
Areas of Expertise	Frontend Architecture, Design Systems, Real-Time Systems, Dashboard Applications, Performance Optimization
Languages	Turkish (Native), English (C1)

Experience

Ratio Energy

Ankara, Turkey

Frontend Software Development Lead

Aug. 2023 – Present

- **Designed the frontend architecture** of real-time energy management and energy trading platforms, leading key technical decisions.
- Developed dashboards, alarm management, and monitoring interfaces for **mission-critical 24/7 energy operations**.
- Optimized performance and memory usage for applications processing **30,000+ real-time signals**, significantly improving stability and reducing browser crashes.
- Contributed to a **WebSocket-based real-time data infrastructure**, ensuring reliable and scalable handling of high-frequency data streams.
- Led **frontend modernization initiatives**, establishing a shared design system and reusable component library.
- Mentored a **team of 3 frontend engineers**, driving architectural improvements, code quality, and AI-assisted development practices.

Virtual Projects

Istanbul, Turkey

Software Engineer

Jun. 2021 – Aug. 2023

- Contributed to the frontend development of **analytics and reporting platforms** used by mobile game teams.
- Built analytics interfaces using **D3, SVG, and Recharts** for retention, churn, cohort analysis, and A/B testing.
- Improved performance and user experience through rendering and data-loading optimizations for large datasets.
- Created a **shared design system** to improve consistency and accelerate development across products.
- Developed **internal tools for developers and artists**, improving operational efficiency and content production workflows.

WesterOps

Istanbul, Turkey

Software Engineer

Jul. 2020 – Jun. 2021

- Contributed to the frontend development of **web-based commerce platforms** with integrated payment systems.
- Implemented **multi-language and multi-currency support** for international users.

Education

Sakarya University

Sakarya, Turkey

Bachelor's Degree in Computer Engineering

Sep. 2014 – Aug. 2020
