Alper **Sarper**

Frontend Lead · Senior Frontend Engineer

Istanbul, Turkey

(+90) 5426467305 | alpersarper.dev@gmail.com | alpersarper | alpersarper

Summary

Senior Frontend Engineer with **5+ years of experience** building **scalable React/Next.js applications**, **real-time systems**, and **performance-critical dashboards**, leading **core product development** and mentoring **small teams**.

Skills

Frontend (Core)	React, Next.js, TypeScript, State Management, Design Systems, Performance Optimization, Real-time Systems, Data Visualization
Frontend Tooling	Redux, Zustand, Ant Design, Styled-components, Tailwind, Vite, Webpack, Storybook, Playwright (E2E), GraphQL
Backend & Platform	Node.js, Python (Django), REST APIs, AWS (Lambda, S3, CloudFront), Docker, CI/CD
Languages	Turkish, English

Experience

Ratio Energy

Ankara, Turkey

Frontend Software Development Lead

Aug. 2023 – Jan. 2026

- Owned frontend architecture for **real-time energy monitoring and trading platforms**.
- Built 24/7 operational monitoring systems used by field engineers in production.
- Delivered UIs processing **30,000+ live signals** with virtualization and throttling optimizations.
- Architected resilient WebSocket infrastructure in a **dedicated Web Worker** with retry + reconnect.
- Developed multi-screen dashboards with live alerts, interactive diagrams, and map visualizations.
- Unblocked delivery by owning frontend-backend contracts, publishing API specs, and building production-ready UIs with mock data, layered validation, and progressive integration.
- Accelerated delivery with AI-assisted development workflows (Cursor, agent-based tooling), improving iteration speed, refactors, and debugging.
- Led a **strategic React 18 rewrite**, introducing a maintainable token-based design system.
- Scaled from solo engineer to leading a team of three, driving technical decisions and mentoring.

Virtual Projects

Istanbul, Turkey

Software Engineer

Jun. 2021 – Aug. 2023

- Owned internal analytics dashboards for **retention, churn, and campaign performance**.
- Shipped data-heavy dashboards backed by Athena + DynamoDB aggregation pipelines.
- Improved load time by isolating chart rendering, decoupling requests, and disabling SSR where harmful.
- Built custom cohort and experimentation visualizations with **SVG, D3, and Recharts**.
- Integrated backend-driven RBAC to gate A/B testing, analytics access, and live game configuration.
- Developed an internal asset management tool (Next.js, Lambda, S3), replacing Google Drive workflows.
- Owned frontend architecture in a lean team and mentored another engineer as tooling scaled.

WesterOps

Istanbul, Turkey

Software Engineer

Dec. 2020 – Jun. 2021

- Joined as a Junior Backend Engineer (Python/Django), transitioned quickly to frontend ownership in React.
- Delivered responsive, pixel-perfect UIs from Adobe XD with cross-browser support.
- Built a virtual event platform with Jitsi video, shipped as a COVID-era proof of concept.
- Partnered with design + backend teams on UX flows, frontend priorities, and feature delivery.
- Led delivery of a multi-panel food ordering platform (customer, courier, business, admin).
- Supported multi-country and multi-currency PoCs, integrating payments and localization logic.

Education

Sakarya University *Sakarya, Turkiye*
B.S. in Computer Science and Engineering Sep. 2014 - Aug. 2020
